---

# Innovations in development of automotive seating and automotive batteries

---

## Summary

---

*A UK global leader in automotive systems & components with an online open innovation platform enabling external inventors to easily share their technology ideas are looking for commercial, technology & research partners in the areas of 1) Automotive batteries (recycling, Li-ion, advanced battery chemistry, technological serviceability, remanufacturing), 2) Automotive seating (materials technology, 'smart' surfaces, human interaction and manufacturing, tooling and assembly) & (3) Engineering IT.*

# Innovative technologies for industrial waste reuse or recycling

---

### Summary

---

*An Italian company working in the waste management sector is looking for innovative technologies for industrial waste reuse or recycling. The company is interested in manufacturing or commercial agreements with technology developers*

## Technology Request

---

### **Request for innovative and niche analytical / scientific instruments and lab equipment: materials testing, electro-mechanical, thermal management, gases / particulates (licensing)**

---

#### **Summary**

---

*A South East UK instrumentation manufacturer wants to develop its portfolio by identifying novel and niche instruments for materials testing and gas / particulate analysis. The company is primarily interested in licensing opportunities from manufacturers and research institutes with a view to developing technologies and adding them to their portfolio. Technical cooperation with the company to test use of proposed solutions in different applications is important.*

---

#### **Details**

---

##### **Technical Specification or Expertise Sought**

Technologies offering advances in the following fields are sought (standard, generic equipment will not be considered): •Materials testing •Non-destructive testing methods •Dimensional /mass measurement •Testing of electro-mechanical systems •Measurement of mechanical forces •Temperature / thermal measurement •Gas / particulate analysis

## Technology Request

---

# Technology for video analysis in media asset management tools

---

## Summary

---

*A Swedish university spin-off company active in agile software development to a global market, specializing in media asset management (MAM), open source solutions, and interaction design is now looking for video analysis technologies that can be included in their MAM-tools with existing metadata extraction battery. Technical and commercial cooperation with academia and/or companies in the ICT (Information and Communication Technology) industry is sought.*

Reference TRSE20140325002

---

## Details

---

### Technical Specification or Expertise Sought

The analysis software should preferably operate in real-time, and the training data requirements needs to be realistic. Polished GUI's (Graphical user interface) and the like are not necessary, as the company would be happy to provide these themselves.
