

Nowadays, in the period of gas crisis, Ukraine urgently needs modernization of heating systems substituting natural gas with local fuel and energy and thermo buildings. A new specialized trade show and forum, Independent Heat-and-Power Engineering, was launched to serve this mission and for the first time it took place on November 19 – 20, 2014 and received support of State Agency Energy Efficiency of Ukraine, Association of Cities of Ukraine, international programs USAID, NEFCO, IFC, GIZ. Independent Heat-and-Power Engineering has drawn attention in the professional community and really became a platform to discuss strategies and share experiences, demonstrations of equipment and technology, professional communication.

Kyiv, 21-23.04.2015

National Specialized Trade Show and Forum

Independent Heat & Power Engineering

www.t-energy.com.ua

The Main Tasks of trade show and forum:

FOR INDEPENDENCE FROM GAS!

1. Support processes of urgent modernization of infrastructure utilities.
2. Implementation of energy audit and energy management.
3. Support of thermo-modernization process implementation for buildings.
4. Implementation of energy saving technologies and renewable heat generation.
5. Promotion of industry decentralization and de-monopolization, foundation of municipal, commercial heat generating companies working on alternative energy sources.

Organizer

Official Support

Branch Support

The Main Visitors' Groups of the Forum:

- Local, regional administrations, village councils.
- Utility companies, housing and communal enterprises.
- Industrial companies.
- Real estate various forms of ownership.

Thematic Areas:

• HEAT GENERATION:

- Heat generators
- Heat pumps
- Heliocollectors
- Modular Heat Plants
- Cogeneration plants
- Recuperation installations
- Air conditioning systems, fan coil system
- Boilers for solid fuel
- Pyrolysis / gasgenerating boilers
- Liquid fuel boilers
- Gas boilers
- Electric boilers
- Burners
- Furnaces and fireplaces
- Infrared heating
- Floor heating
- Convector, water heaters

- Heat accumulating tanks and heat exchangers
- Circulation pumps

• BIOFUEL PRODUCTION:

- Biomass
- Solid biofuels
- Biogas plants
- Lines for granulation
- Lines for briquetting
- Crushing equipment
- Drying systems
- Granulators
- Silos for storage
- Equipment for quality control

• THERMO-INSULATION:

- Energy audit, energy consulting
- Thermal imager

- Insulation materials and technologies
- Insulation of pipes
- Temperature regulators
- Heat measuring, monitoring and metering
- Automatic balancing valves

• AUTOMATION FOR HEAT ENGINEERING.

Participation fee

Equipped exhibition area, 1 sq. m	€ 110
Raw exhibition area, 1 sq. m	€ 80
Outdoor exhibition area, 1 sq. m	€ 65

VAT is included.

Business Program

Business program is an integral part of the trade show. Two key conferences will be presented:

April 21

• MUNICIPAL INVESTMENTS FORUM,

which will present municipal strategies and energy plans for buildings and heating systems modernization, to substitute gas with local fuel and energy, financing of energy-saving projects, foundation of energy management systems.

April 22 – 23

• THE KEY TECHNOLOGIES TO REPLACE NATURAL GAS CONFERENCE.

Conference sections:

- Biofuels / biogas.
- Heat pumps.
- Thermo-modernization of buildings.
- Energy efficient technologies of operating equipment.

Reports will be made by senior energy-saving experts and professionals.

Forum participation fee

30 minute report:	
for exhibitors	€ 35
for non-exhibitors	€ 80
Section sponsor	€ 400
Conference sponsor	€ 800

VAT is included.

Organizing Committee Contacts

56, Peremohy Ave., Kyiv, 03680, www.euroindex.ua

- For Trade Show participation, please, contact our Commercial Department: +380 (44) 461-9306, Sergiy Krot, krot@eindex.kiev.ua
- For Forum participation, please, contact our Marketing Department: +380 (44) 461-9303, Iryna Nosar, nosar@eindex.kiev.ua
